CRIMINAL JUSTICE PARTNERSHIP PROGRAM

SECTION 19.11.(a) Notwithstanding any other provision of law, a county may use funds appropriated pursuant to the Criminal Justice Partnership Act, Article 6A of Chapter 143B of the General Statutes, to provide more than one community-based corrections program.

SECTION 19.11.(b) Effective July 1, 2009, the Department of Correction shall recalculate the county allocation funding formula mandated under G.S. 143B-273.15 using updated data.

SECTION 19.11.(c) Notwithstanding the provisions of G.S. 143B-273.15 specifying that grants to participating counties are for the full fiscal year and that unobligated funds are returned to the State-County Criminal Justice Partnership Account at the end of the grant period, the Department of Correction may reallocate unspent or unclaimed funds distributed to counties participating in the State-County Criminal Justice Partnership Program in an effort to maintain the level of services realized in previous fiscal years.

SECTION 19.11.(d) The Department of Correction may not deny funds to a county to support both a residential program and a day reporting center if the Department of Correction determines that the county has a demonstrated need and a fully developed plan for each type of sanction.

SECTION 19.11.(e) The Department of Correction shall report by March 1 of each year to the Chairs of the House of Representatives and Senate Appropriations Committees, the House of Representatives and Senate Appropriations Subcommittees on Justice and Public Safety, and the Joint Legislative Corrections, Crime Control, and Juvenile Justice Oversight Committee on the status of the State-County Criminal Justice Partnership Program. The report shall include the following information:

- (1) The amount of funds carried over from the prior fiscal year;
- (2) The dollar amount and purpose of grants awarded to counties as discretionary grants for the current fiscal year;
- (3) Any counties the Department anticipates will submit requests for new implementation grants;
- (4) An update on efforts to ensure that all counties make use of the electronic reporting system, including the number of counties submitting offender participation data via the system;
- (5) An analysis of offender participation data received, including data on each program's utilization and capacity;
- (6) An analysis of comparable programs prepared by the Division of Research and Planning, Department of Correction, including a comparison of programs in each program type on selected outcome measures developed by the Division of Community Corrections in consultation with the Fiscal Research Division and the Division of Research and Planning, and a summary of the reports prepared by county Criminal Justice Partnerships Advisory Boards;
- (7) A review of whether each sentenced offender program is meeting established program goals developed by the Division of Community Corrections in consultation with the Division of Research and Planning and the State Criminal Justice Partnership Advisory Board;
- (8) The number of community offenders and intermediate offenders served by each county program;
- (9) The amount of Criminal Justice Partnership funds spent on community offenders and intermediate offenders; and
- (10) A short description of the services and programs provided by each partnership, including who the service providers are and the amount of funds each service provider receives.

Section 19.11 of SB 202 (S.L. 2009-451)

Introduction

The Criminal Justice Partnership Program (CJPP) provides grants to support community-based programs aimed at reducing recidivism, probation revocations, alcoholism and other drug dependencies, and the costs of incarceration to the state and counties. The Division of Community Corrections (DCC) administers the program. During FY 2008-2009, the eligible offender population included adult sentenced offenders who received an intermediate sanction and post-release or parole offenders.

For the FY 2008-2009, CJPP funded 84 programs which were operating in 94 counties. For a variety of reasons, four counties have never applied for or received funding (Bladen, Dare, Hyde and Lincoln). Over the history of CJPP, the types of programs operating have consolidated into three basic types as described below:

- *Day Reporting Centers* (19 total programs statewide) function as a restrictive intermediate punishment sanction within Structured Sentencing. Aiming to provide a measure of control and treatment, the centers provide increased structure to the offender's daily activities by requiring attendance at the day reporting center in combination with restrictive supervision from DCC. DCC probation officers are housed within each day reporting center, and noncompliant behavior receives an immediate response. Probation officers also assist with case management and planning, and deliver some direct services such as cognitive behavioral intervention counseling. Required core services include substance abuse treatment, drug screening, basic education assistance, cognitive behavioral intervention and employment assistance. Services are offered during both day and evening hours, and a continuum of consequences and rewards exists as a behavioral management tool. Free services that may be available are offered on-site and CJPP funds cannot be used to provide any duplication of existing services.
- *Satellite Substance Abuse Programs* (41 total programs statewide) function as a one-stop location for substance abuse treatment services. Treatment services are provided through a contractual agreement with a licensed provider. Services include assessments, individual treatment plans, and treatment programs of intensive outpatient or regular outpatient depending on the assessed need. The programs also provide aftercare services. DCC probation officers provide assistance to treatment staff with drug screening, attendance, and responses to noncompliant behavior.
- *Resource Centers* (24 total programs statewide) function as a one-stop location for a variety of services, similar to day reporting centers, but without the required core services included in a day reporting center. Services also may be delivered off-site through a referral process. Many of the same services offered within the day reporting centers are offered, depending upon the most important need for the county and funding support. DCC probation officers provide assistance as well.

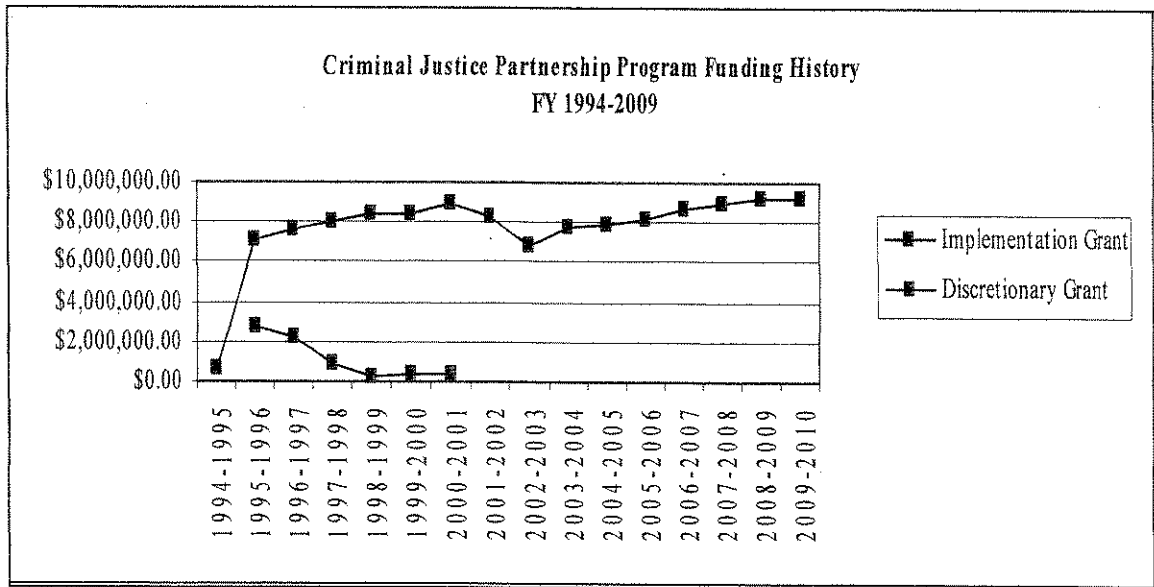

Appendix A provides additional detail on each location and program type.

The total funds for CJPP have decreased since the program first was fully funded in FY 1995-1996. Originally, funding was established at \$12 million annually: \$9.6 million for “implementation” or operating funds grants and \$2.4 million for discretionary grants.

In the intervening years, the General Assembly has implemented various types of reductions in CJPP funding, including across-the-board cuts; restricting funding to counties participating during the previous fiscal year; targeting cuts to counties operating day reporting centers and other programs for the funding of case manager positions; and the total elimination of discretionary grant funding. In an effort to assist counties with these funding reductions, in FY 2002-2003, the General Assembly authorized the reallocation of unspent or unclaimed CJPP funds on a case-by-case basis to counties in need of additional funding to maintain services.

For FY 2008-2009, the certified appropriation for CJPP was \$9,410,863. The chart below illustrates the history of CJPP funding since FY 1994-95.

CJPP Program Funding History

For FY 2008-09, grant awards to counties were based on the following formula pursuant to N.C.G.S. § 143B-273.15: (1) twenty-five percent (25%) based on a fixed equal dollar amount for each county; (2) fifty percent (50%) based on the county share of the state population; and (3) twenty-five percent (25%) based on the intermediate punishment entry rate for the county, using the total of the three most recent years of data available divided by the average county population for that same period. The sum of these amounts represented the total amount of the funding that a county could receive. N.C.G.S. § 143B-273.15 also provided that “grants to participating counties are for a period of one fiscal year with unobligated funds being returned to the account at the end of the grant period.” Funds are provided to participating counties on a reimbursement basis unless a county documents a need for an advance of grant funds.

Appendix B provides a list of each county's statutory appropriation and the amount of carryover funds for FY 2008-2009.

1. Funding Carryover FY 2007-2008 to 2008-2009:

CJPP funding does not revert at the end of a fiscal year. Instead, this amount is carried forward and can be used until August 15 and for the semiannual reallocated request.

\$3,237,874	Carry-over funding
- \$1,852,045	End of year expenditures (FY 2007-2008)
\$1,385,829	(Carryover Balance)
- 450	Reallocation expenditures for (FY 2008-2009)
\$1,385,379	(Carryover Balance)

2. Discretionary Funding FY 2008-09

During FY 2008-2009, CJPP was authorized to reallocate unspent or unclaimed funds to counties in an effort to maintain the level of services realized in previous years. For FY 2008-2009, DCC reallocated \$450 to participating counties that demonstrated a need for additional funds. DCC was unable to reallocate additional funding because the Department of Correction withheld CJPP discretionary funding to meet the four percent reversion target established by the Office of State Budget and Management for FY 2008-09.

Appendix C provides the amount of reallocated funds that each county received during FY 2008-2009.

3. New Requests

Ninety-four of North Carolina's 100 counties receive CJPP funding. Of the remaining six counties, four counties have never participated in CJPP or applied for implementation funding: Bladen, Dare, Hyde and Lincoln. The remaining two counties—Lee and Person—are funded but do not participate in CJPP.

4. Electronic Reporting

All participating programs submit data via the CJPP Information Management System (CJPP IMS) An electronic database that provides offender-specific data to be used to produce reliable outcome information. DCC administrative staff and CJPP community development specialists provide continual assistance, support and training to the programs in order to maintain consistent use.

5. Offender Participation Data

Each county has wide latitude under the Partnership Act to determine needs and program design through the local county advisory board. While DCC staff members provide oversight and technical assistance, the decision on what is best for the county is a local decision. All of the CJPP programs provide some combination of substance abuse treatment, education and employment services.

The average cost per offender per day for FY 2008-2009 was \$18.88 for day reporting centers, \$12.65 for satellite substance abuse centers and \$10.71 for resource centers. These reported costs do not take into consideration expenditures funded by the county or any other outside sources, but do represent the total cost for all state funds, including administrative overhead. For FY 2008-2009, the following table provides the overall use statewide for each program type:

but do represent the total cost for all state funds, including administrative overhead. For FY 2008-2009, the following table provides the overall use statewide for each program type:

CJPP Statewide Utilization FY 2008-2009

Population on July 1, 2008		Entries	Exits	Offender Utilization	Yearly Offender Service Goal	Percent of Offender Goal Utilized	Cost Per Day Per Offender
DRC	808	1,674	1,822	2,482	2,526	98%	\$18.88
SSA	762	1,757	1,757	2,519	2,771	90%	\$12.65
RC	654	1,226	1,340	1,880	2,149	88%	\$10.71
Totals	2,224	4,657	4,919	6,881	7,446	92%	\$14.96

6. Analysis of Comparable Programs

DOC Research and Planning conducts an annual review of the offender participation data and program analysis, the results of which are contained in *Appendix D*. *Appendix D* contains a thorough analysis and comparison of the different types of CJPP programs. The report identifies three major objectives--protect the public, maintain compliance, and improve offender behavior—that are evaluated using the following intermediate outcome measures: demographics of admitted offenders; admission by Structured Sentencing grids; exits by reported exit type; program exits drug test results; success of offender services; and employment data. The analysis indicates that programs strive to achieve the objectives in a number of ways. First, CJPP programs protect the public by addressing the needs of a high-risk offender population, which includes a heavy concentration of felons and offenders required to participate in CJPP as a result of a violation or the use of a probation officer’s delegated authority. Second, CJPP promotes compliance as evidenced by the fact that the revocation rate is only slightly higher than the rate for other intermediate sanctions--despite the fact that many CJPP offenders already are engaged in the violation process or have demonstrated noncompliant behavior in other ways. Finally, the analysis indicates that offenders are more likely to succeed if they successfully complete CJPP programs such as cognitive behavioral intervention, life skills, substance abuse treatment and education.

7. Standards Evaluation

In 2002, DCC developed minimum program standards for all programs that receive CJPP funding. The standards are based on best practices and available scientific research indicating what works best in correctional programs to achieve behavioral change. Since implementation, the DCC staff has completed quality assurance reviews of most participating programs to determine compliance with the minimum program standards. For FY 2008-2009, the results continue to show that the majority of the programs meet the minimum standards.

In FY 2007-2008 the Office of Research and Planning introduced the Correctional Program Assessment Inventory-2000 (CPAI) to NCDOC Programs. The CPAI-2000 was designed to assess the integrity of correctional programs in relation to the empirical research on effective correctional interventions (Andrews, 1995; Wormith, 2003). It was developed based on decades of research and meta-analytic work on effective correctional interventions (Wormith, 2003).

Specifically, the CPAI-2000 utilizes the principles of effective correctional treatment as a template for the “ideal” program, and measures how closely the program under review is to this ideal (Andrews & Bonta, 2003; Gendreau & Andrews, 1996; Wormith, 2003). One advantage, and one of the most powerful aspects of the CPAI-2000, is that the measure is based on empirical research and solidifies the principles of effective correctional treatment (Wormith, 2003). The CPAI-2000 has become accepted as a tool to evaluate virtually all types of correctional interventions regardless of the client group or the type of program under review. It has now been applied to more than 280 correctional programs in Canada (Gendreau & Goggin, 1997; Wormith, 1997), and over 500 programs in the United States (University of Cincinnati, 2006).

Research and Planning evaluated two day reporting centers, Randolph and Buncombe counties, in FY 2008-2009. While these two programs did not score as high as the previous fiscal year evaluations, each program did receive an action plan for improvements. During the FY 2008-2009, budget shortfalls impeded Research and Planning’s ability to reevaluate the programs.

The CPAI-2000 consists of nine dimensions that contain 144 items which are used in the assessment.

1. Program demographics
2. Organizational Culture
3. Program Implementation and Maintenance
4. Management/Staff Characteristics
5. Client Risk and Need Practices
6. Program Characteristics
7. Core Correctional Practices
8. Interagency Communication
9. Evaluation

Appendix E provides the standards and quality assurance review requirements.

8. Program Descriptions, Service Providers and Provider Funding Amounts

Each of the CJPP programs provides a variety of services designed to meet offender needs. Providers of these services vary by location, depending on the program type and county resources. In many programs, the use of free services is utilized when possible, and the program staff often is certified to provide services as well. DCC probation officers also provide direct services to offenders, such as assisting with cognitive behavior intervention classes. Contractual service providers are utilized in many areas as well. The service provider contracts are included as a part of the application for the continuation of implementation funding on an annual basis. Each local program is responsible for maintenance of the provider contract details. For FY 2008-2009, contractual expenditures represented 63 percent of the total expenditures.

Appendix F provides the listing of the contract service providers and the associated funding for their services.

Summary

CJPP programs continued to improve service delivery during FY 2008-2009, with a determined focus on ensuring that evidence-based practices were implemented and delivered to the targeted offender population. DCC began providing training on evidence based practices and encouraged CJPP program staff to attend. CJPP programs will continue to improve as DCC's risk/needs instrument becomes fully operational with the appropriate referrals in each program.

The annual review of the data and comparative analysis of the programs continues to indicate that the programs are meeting the affirmed goals. While there are differences in the programs and in their levels of success, DCC is devoted to providing appropriate assistance to enable continued improvement in offender outcomes for this extremely valuable resource. In this time of budget shortfalls, CJPP remains one of the few available local resources that allow offenders to receive the treatment and services they need to stay focused on leading productive lives. CJPP represents a one-of-a-kind partnership between the state, counties, and various treatment, education and vocational providers working jointly to effect positive behavioral change in the thinking, motivation, and actions of criminal offenders.

Appendix D to FY 2008-2009

CJPP Annual Report

January 2010

Office of Research & Planning

Department of Correction

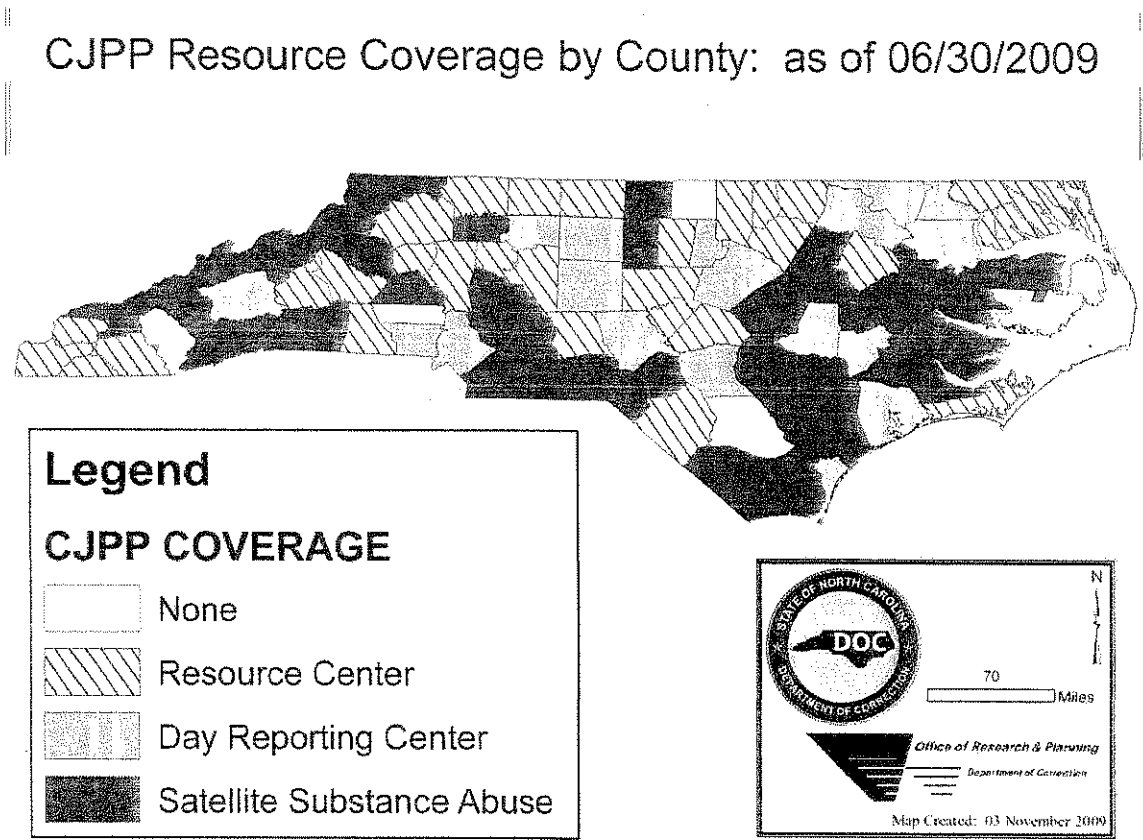

Analysis of CJPP Offender Participation Data
Received During Fiscal Year 2008-2009

Data Sources for this Report

CJPP local programs store data in and report data from a computer system called the CJPP Information Management System (IMS). The data was extracted from the IMS system as of October 24, 2009. Data for participants in the Sentenced Offender programs was also obtained from the Department of Correction's Offender Population Unified System (OPUS) as of October 24, 2009.

Map of Counties with CJPP Programs

The map below shows the North Carolina counties that are served by a CJPP funded sentenced offender program, and the type of program available (Day Reporting Center, Satellite Substance Abuse program, or Resource Center):

CJPP Sentenced Offender Program Outcome Measures

In 2004 the Division of Community Corrections and representatives from the Criminal Justice Partnership State Advisory Board and the Criminal Justice Partnership Local Advisory Boards identified outcomes measures to assess program performance of types of programs. They identified three objectives: protect the public, maintain compliance, and improve offender behavior. For each objective they identified intermediate outcomes, which were refined in 2007. The cohort for all outcome measures is offenders who were in the CJPP program for at least one day during the evaluation period

2010 CJPP Report

(beginning population + entries), who participated in the program at least 30 days, and have subsequently exited the program.

The following charts present information pertaining to each program type objectives and/or intermediate outcomes:

CJPP OUTCOME MEASURES AND UTILIZATION – BY PROGRAM TYPE
DAY REPORTING CENTER

<i>The cohort for all measures is offenders who were in the CJPP program for at least one day during the evaluation period (beginning population + entries), who participated in the program at least 30 days, and have exited the program.</i>		Evaluation Period 07/01/08 – 06/30/09	
DRC Objective/Outcome Measure			
<i>Protect the Public</i>		NUMBER	PERCENT*
1.	CJPP offenders who were in absconder status during the evaluation period and after their CJPP entry date (percent is of offenders who did not exit the program with a successful CJPP exit reason).	171	16.5%
2.	CJPP offenders who were in absconder status during the evaluation period (#1) and were subsequently captured during their period of supervision**	137	80.1%
3.	CJPP offenders who were in absconder status during the evaluation period (#1) and have a new crime conviction with an offense date between beginning CJPP and capture.**	15	8.8%
4.	Any CJPP offenders who have a new crime conviction in OPUS with an offense date during their time in the CJPP program.	108	5.5%
5.	CJPP offenders revoked to prison within 6 months of exiting the program (percent is of offenders who did not exit the program with a successful CJPP exit reason).	376	48.1%
6.	CJPP offenders whose supervision was terminated early after participating in a CJPP program.	150	7.6%
7.	CJPP offenders whose supervision was completed, or are still on active supervision after participating in a CJPP program.	1,047	52.9%

<i>The cohort for all measures is offenders who were in the CJPP program for at least one day during the evaluation period (beginning population + entries), who participated in the program at least 30 days, and have exited the program.</i>		Evaluation Period 07/01/08 – 06/30/09	
DRC Objective/Outcome Measure			
<i>Maintain Compliance (after beginning CJPP Program)</i>		NUMBER	PERCENT*
8.	Violations by CJPP offenders during time in program (offender may have more than one violation type)	948	47.9%
	a. Absconding	195	9.6%

2010 CJPP Report

	b.	Failure to Follow Curfew Restrictions	534	27.0%
	c.	Failure to Meet Financial Obligations	500	25.3%
	d.	Substance Abuse	623	31.5%
	e.	Treatment Failure	145	7.3%
9.	Participation in selected CJPP services (Average Attendance Rates)*** Overall -		3,916	76.5%
	a.	CBI: Cognitive Behavior Interventions	827	81.4%
	b.	Educational Services	912	77.8%
	c.	Substance Abuse Services	1,436	76.1%
	d.	Vocational/Employment Services	741	70.2%

<i>The cohort for all measures is offenders who were in the CJPP program for at least one day during the evaluation period (beginning population + entries), who participated in the program at least 30 days, and have exited the program.</i>		Evaluation Period 07/01/08 – 06/30/09	
DRC Objective/Outcome Measure			
Improve Offender Behavior (after beginning CJPP Program)		NUMBER	PERCENT*
10.	Percentage of negative drug screens in the six month period after a positive screen that occurred during the offender's time in CJPP.	1,112	46.6%
11.	Successful completion of select services (offender may have more than one service type) ***	1,284	40.2%
	a. CBI: Cognitive Behavior Interventions	538	65.1%
	b. Educational Services	561	61.5%
	c. Substance Abuse Services	860	59.9%
	d. Vocational/Employment Services	506	68.3%
12.	CJPP offenders who maintained or obtained employment (entered CJPP and left employed, or entered unemployed and left employed)	1,017	51.4%
13.	Offenders who were referred to CJPP through the violation process who successfully completed their supervision period, or are still on active supervision (percent is of violator entries).	387	48.1%

* In most instances the percentages are of all offenders who participated in a CJPP program for at least 30 days during the FY and subsequently exited.

** Rates are expressed as the percentage of CJPP offenders in absconder status at some point during the FY.

*** Percentages are of offenders who received each specified CJPP services during the FY.

	c.	Substance Abuse Services	1,211	79.9%
	d.	Vocational/Employment Services	222	78.2%

<i>The cohort for all measures is offenders who were in the CJPP program for at least one day during the evaluation period (beginning population + entries), who participated in the program at least 30 days, and have exited the program.</i>		Evaluation Period 07/01/08 – 06/30/09	
RC Objective/Outcome Measure			
Improve Offender Behavior (after beginning CJPP Program)		NUMBER	PERCENT*
10.	Percentage of negative drug screens in the six month period after a positive screen that occurred during the offender's time in CJPP.	528	55.1%
11.	Successful completion of select services (offender may have more than one service type) ***	851	26.6%
	a. CBI: Cognitive Behavior Interventions	148	71.8%
	b. Educational Services	165	58.5%
	c. Substance Abuse Services	731	60.4%
	d. Vocational/Employment Services	138	62.2%
12.	CJPP offenders who maintained or obtained employment (entered CJPP and left employed, or entered unemployed and left employed)	767	52.6%
13.	Offenders who were referred to CJPP through the violation process who successfully completed their supervision period, or are still on active supervision (percent is of violator entries).	442	52.9%

* In most instances the percentages are of all offenders who participated in a CJPP program for at least 30 days during the FY and subsequently exited.

** Rates are expressed as the percentage of CJPP offenders in absconder status at some point during the FY.

*** Percentages are of offenders who received each specified CJPP services during the FY.

DOC Research & Planning - 29OCT09
(Hudson/SASPGMS/CJPP/SO_CJPP_utilization.SAS)

Appendix E

Criminal Justice Partnership Program Quality Assurance Review

Written Program Policies & Procedures:

- Conditions of eligibility for offenders to participate in the program
- Nondiscrimination in acceptance of offenders
- Intake and assessment
- Rights and responsibilities of offenders and staff, written program rules
- Confidentiality protections, release of information, review of offender case files
- Content of case records
- Storage and retention of records
- Service and or treatment planning
- Staffing levels and offender supervision while participating
- Referrals to other resources
- Offender grievance process
- Termination of services, aftercare planning
- Interagency protocol
- County personnel manual on site
- CJPP policy manual on site, updated

Advisory Board:

- Board activity documentation maintained on site, updated
- Board roster with membership and terms
- Board meeting schedules
- By-Laws
- Meeting minutes
- Board reports

Day Reporting Center:

- **Admission Information**
 1. Orientation
 2. Intake assessment and interview
 3. Rules acknowledgement
 4. Case Plans
 5. Consent for treatment and release of information
 6. Treatment plan and standards
 7. Probation Judgments
 8. Referrals
 9. No show/non-reporting policy and procedure
 10. Drug screening policy and procedures

- **Service Delivery**
 11. IMS Data
 12. Treatment plan reviews
 13. Service notes
 14. Drug screen results
 15. Transfer form copies
 16. Closing summary
 17. Cases and files

Satellite Substance Abuse and Resource Centers:

- **Admission Information**
 1. Orientation
 2. Individualize substance abuse assessments
 3. Psychological social evaluations
 4. Vocational assessment
 5. Legal assessment
 6. Family socioeconomic history
