.2301 GENERAL

(a) Close Observation Regular Population Housing is the assignment of regular population inmates housed in close or medium custody, to an area designated to provide increased security and observation. Inmates assigned to a Close Observation Housing Unit will receive the same privileges as inmates in regular population. Because they pose a threat to the security of the institution, some of their privileges maybe limited. Prior to establishment of a Close Observation Regular Population Housing area, the Facility Head must make a written request up the Chain of Command, for final approval by the Director of the Division of Prisons. After final approval and prior to the establishment of the housing unit, the Facility Head will also notify the inmate population by posting notifications in areas that are accessible to the inmate population.

Inmates that have exhibited behavioral problems, gang affiliation/involvement, strong arming/intimidation tactics or have been determined a threat to the security or the orderly operation of the institution will be candidates for Close Observation Regular Population. Any inmates completing an assignment to Intensive Control (ICON), and returning to the regular population will be assigned to Close Observation Housing.
